

Developing the optional course Man and Law ("Inimene ja õigus")

During the years 1999-2002 a team of 8 lawyers and teachers developed the optional course Man and Law for Estonian compulsory gymnasium school. The course consists of subject syllabi, student textbook and teacher guide. The developed material was field-tested in schools and afterwards printed in 2000 copies in Estonian and 1000 copies in Russian.

During the project the Estonian team members participated in numerous international workshops and trainings arranged by the project partner Street Law Incorporated (USA).

For introducing the course special trainings for teachers were provided during 2001 and 2002 in Estonian and Russian before launching the teaching at schools.

In 2002 a teaching aid material "Inimene ja õigus" was also produced for the 3. grade students.
