

Material about Consumer Education for gymnasium school and adult education

In 2008 Civic Education Centre analysed and adapted the different materials, which were worked out during the implementation of Consumer Education projects since 2000. After expertise of the materials three electronic documents were worked out for gymnasium school and adult education: Consumer Education Student Textbook, Teacher Guide and Syllabus. All the materials are in the form of downloadable PDF files. The project was supported by Estonian Ministry of Economic Affairs and Communications. Estonian Consumer Protection Board served as an expert body.
